CS/SSW 555 GEDCOM Sprint Grading Guidelines

The GEDCOM project includes four sprints where teams are responsible for delivering features described by user stories. Each student's grade is the sum of a team score of 50 points plus an individual score of 50 points.   Everyone on the team receives the same team score.

	Deliverable	Total Points	Notes
Team Score			
	Updated Burn Down Chart	5	The burn down chart should be updated each sprint
	Plan for Next Sprint	5	Identify the user stories and effort estimate for next sprint
	Updated Sprint Review	5	What went well and what needs to improve. Don't simply copy from previous sprints
	Individual/Family Summary Tables	5	Describe important characteristics of each GEDCOM individual and Family
	Continuous Integration Solution	5	Each team must implement a Continuous Integration solution, e.g. Travis CI
	User story documentation	5	Team report must identify the source code file name, function/method name, and starting line for each user story added during the sprint
	User story demonstrations	20	2-point penalty for each user story that is not demonstrated
Individual Score			
	User story 1 implementation	8	
	User story 1 automated test	5	
	User story 1 demonstration	2	
	User story 2 implementation	8	
	User story 2 automated test	5	
	User story 2 demonstration	2	
	Teammate assessment	20	
Total Score		100
